ĐỀ THI VÀ ĐÁP ÁN
THI KẾT THÚC HỌC PHẦN
Học kỳ 3, năm học 2023-2024

I. Thông tin chung

Tên học phần:	Kinh tế vĩ mô		
Mã học phần:	233_72ECON20033	Số tín chỉ:	03
Mã nhóm lớp học phần:	233_72ECON20033_01,02		
Hình thức thi: Trắc nghiệm kết hợp Tự luận	Thời gian làm bài:	90	phút
<i>Thí sinh chỉ được tham khảo tài liệu giấy</i>	<input checked="" type="checkbox"/> Có	<input type="checkbox"/> Không	

ĐỀ THI LẦN 02 – Đề 2

II. Các yêu cầu của đề thi nhằm đáp ứng CLO

(Phần này phải phối hợp với thông tin từ đề cương chi tiết của học phần)

Ký hiệu CLO	Nội dung CLO	Hình thức đánh giá	Trọng số CLO trong thành phần đánh giá (%)	Câu hỏi thi số	Điểm số tối đa
(1)	(2)	(3)	(4)	(5)	(6)
CLO1	Develop an introductory understanding of macroeconomic concepts, topics and theories of how to address macroeconomic problems;	<i>Trắc nghiệm</i>	16.67%	1,2,3,4,5,6,7,12,13,19	2.5
CLO2	Understand how to apply macroeconomic principles to a range of policy questions;	<i>Trắc nghiệm</i>	16.67%	8,9,10,14,15,21,22,30,31,39	2.5
CLO3	Understand demand and supply model to calculate equilibrium wage rates, employment, interest	Tự luận + <i>Trắc nghiệm</i>	16.67%	11,16,17,23,24,32,33,40 Câu tự luận 01	2.5

	rates and investment in an economy;				
CLO4	Apply elementary economic theories and techniques in business decision making and government policy;	<i>Trắc nghiệm</i>	16.67%	18,25,26,28, 34,35,37	2.5
CLO5	Develop and apply the tools of macroeconomic analysis to critically question, analyze, and discuss economic problems and issues.	Tự luận + <i>Trắc nghiệm</i>	16.66%	27.29,36,38 Câu tự luận 01	
CLO6	Show self-study, self-research and update knowledge, honest working attitude and sense of responsibility towards work.	<i>Trắc nghiệm</i>	16.66%	10,20	

III. Nội dung câu hỏi thi

PHẦN TRẮC NGHIỆM (40 câu, 8 điểm, 0.2 điểm/câu)

1. An increase in the minimum wage results in a(n) _____ in the quantity of labor supplied and a(n) _____ in the quantity of labor demanded in a competitive labor market.

- A. increase; decreased
- B. increase; increase
- C. decrease; increase
- D. decrease; decrease.

ANSWER: A

2. To maintain their standard of living, most people rely on

- A. their labor earnings.
- B. their personal savings.
- C. government assistance.
- D. rental income.

ANSWER: A

3. Who among the following would be counted as “unemployed”?

- A. Shasta, who is waiting to be recalled to a job from which she has been laid off.
- B. Karen, who neither has a job nor is looking for one.
- C. Mary, who worked only 35 hours last week.
- D. Tuan, who works for his family.

ANSWER: A

4. In June 2009 the Bureau of Labor Statistics reported an adult population of 234.9 million, a labor force of 154 million and employment of 141.6 million. Based on these numbers the unemployment rate was

- A. 8.05%
- B. 5.2%.
- C. 6.06%.
- D. 3.9%

ANSWER: A

5. International trade

- A. raises the standard of living in all trading countries.
- B. lowers the standard of living in all trading countries.
- C. leaves the standard of living unchanged.
- D. raises the standard of living for importing countries and lowers it for exporting countries.

ANSWER: A

6. In an open economy, national saving equals domestic investment

- A. Plus the net outflow of capital.
- B. Minus the net exports of goods and services.
- C. Plus the government's budget deficit.
- D. Minus foreign portfolio investment

ANSWER: A

7. Goods and services produced abroad and purchased domestically are called

- A. imports.
- B. exports.
- C. net imports.
- D. net exports.

ANSWER: A

8. Other things the same, if a country's domestic investment decreases, then

- A. net capital outflow rises, so net exports rise.
- B. net capital outflow rises, so net exports fall.
- C. net capital outflow falls, so net exports rise.
- D. net capital outflow falls, so net exports fall.

ANSWER: A

9. A country has a trade deficit. Which of the following must also be true?

- A. net capital outflow is negative and domestic investment is larger than saving
- B. net capital outflow is positive and saving is larger than domestic investment
- C. net capital outflow is positive and domestic investment is larger than saving
- D. net capital outflow is negative and saving is larger than domestic investment

ANSWER: A

10. Last year a country had exports of \$100 billion, imports of \$70 billion, and purchased \$60 billion worth of foreign assets. What was the value of domestic assets purchased by foreigners?

- A. \$30 billion
- B. \$40 billion
- C. \$70 billion
- D. \$10 billion

ANSWER: A

11. Last year a country had exports of \$50 billion, imports of \$60 billion, and domestic investment of \$40 billion. What was its saving last year?

- A. \$30 billion
- B. \$20 billion
- C. \$10 billion
- D. -\$10 billion

ANSWER: A

12. The open-economy macroeconomic model takes

- A. both the price level and GDP as given.
- B. the price level, but not GDP as given.
- C. GDP, but not the price level as given.
- D. the price level and GDP as variables to be determined by the model.

ANSWER: A

13. In the open-economy macroeconomic model, the source of the supply of loanable funds is

- A. public saving plus personal saving
- B. public saving
- C. personal saving
- D. public saving plus personal saving plus net capital outflows

ANSWER: A

14. Other things the same an increase in the interest rate

- A. increases national saving, this is shown by moving along the supply of loanable funds curve.
- B. increases national saving, this is shown by moving along the demand for loanable funds curve.
- C. decreases national saving, this is shown by moving along the demand for loanable funds curve.
- D. decreases national saving, this is shown by moving along the supply of loanable funds curve.

ANSWER: A

15. If imports = 600 billion USD, exports = 700 billion USD, purchases of domestic assets by foreign residents = 700 billion USD, and purchases of foreign assets by domestic residents = 800 billion USD, what is the quantity of euros demanded in the market for foreign-currency exchange?

- A. 100 billion euros
- B. 600 billion euros
- C. 50 billion euros
- D. 1,100 billion euros

ANSWER: A

16. In the open-economy macroeconomic model, which of the following increases net capital outflow?

- A. a fall in the real interest rate, but not a fall in the real exchange rate
- B. a fall in the real exchange rate, but not a fall in the real interest rate
- C. both a fall in the real exchange rate and a fall in the real interest rate
- D. neither a fall in the real exchange rate nor a fall in the real interest rate

ANSWER: A

17. If a country raises its budget deficit, then its

- A. net capital outflow and net exports fall.
- B. net capital outflow rises and net exports fall.
- C. net capital outflow falls and net exports rise.

D. net capital outflow and net exports rise.

ANSWER: A

18. An increase in the budget deficit

A. reduces net capital outflow and domestic investment.

B. Reduces net capital outflow and raises domestic investment.

C. raises net capital outflow and domestic investment

D. raises net capital outflow and reduces domestic investment.

ANSWER: A

19. A relatively mild period of falling incomes and rising unemployment is called a(n)

A. recession.

B. depression.

C. expansion.

D. business cycle.

ANSWER: A

20. During a recession the economy experiences

A. falling employment and income.

B. rising employment and falling income.

C. rising income and falling employment.

D. rising employment and income.

ANSWER: A

21. According to classical macroeconomic theory, changes in the money supply affect

A. the price level, but not real GDP.

B. real GDP but not the price level.

C. real GDP and the price level.

D. neither the price level nor real GDP.

ANSWER: A

22. Which of the following shifts aggregate demand to the left?

A. households decide to save a larger fraction of their income.

B. an increase in the price level.

C. an increase in net exports.

D. Congress passes a new investment tax credit.

ANSWER: A

23. Which of the following shifts aggregate demand to the right?

A. The Fed buys bonds in the open market.

B. Congress reduces purchases of new weapons systems.

C. The price level falls.

D. Net exports fall.

ANSWER: A

24. The classical dichotomy and monetary neutrality are represented graphically by

A. a vertical long-run aggregate-supply curve.

B. an upward-sloping long-run aggregate-supply curve.

C. an upward-sloping short-run aggregate-curve.

D. a downward-sloping aggregate-demand curve.

ANSWER: A

25. According to classical macroeconomic theory, changes in the money supply affect

A. variables measured in terms of money but not variables measured in terms of quantities or relative prices

- B.** variables measured in terms of money and variables measured in terms of quantities or relative prices
- C.** variables measured in terms of quantities or relative prices, but not variables measured in terms of money
- D.** neither variables measured in terms of money nor variables measured in terms of quantities or relative prices

ANSWER: A

26. According to sticky-wage theory, if output exceeds its natural rate,

- A.** workers will strike bargains for higher wages. In response to the higher wages firms will produce less at any given price level.
- B.** workers and firms will strike bargains for lower wages. In response to the lower wages firms will produce more at any given price level.
- C.** workers and firms will strike bargains for lower wages. In response to the lower wages firms will produce less at any given price level.
- D.** workers and firms will strike bargains for higher wages. In response to the higher wages firms will produce more at any given price level.

ANSWER: A

27. The price level rises in the short run if

- A.** aggregate demand or aggregate supply shifts right.
- B.** aggregate demand shifts right or aggregate supply shifts left.
- C.** aggregate demand shifts left or aggregate supply shifts right.
- D.** aggregate demand or aggregate supply shifts right.

ANSWER: B

28. According to the theory of liquidity preference, an economy's interest rate adjusts

- A.** to balance the supply and demand for money.
- B.** to balance the supply and demand for loanable funds.
- C.** one-for-one to changes in expected inflation.
- D.** to equal the interest rate prevailing in world financial markets.

ANSWER: A

29. If the central bank wants to contract aggregate demand, it can _____ the money supply and thereby _____ the interest rate.

- A.** decrease; increase
- B.** increase; decrease
- C.** increase; increase
- D.** decrease; decrease

ANSWER: A

30. Shifts in the aggregate-demand curve can cause fluctuations in

- A.** the level of output and in the level of prices.
- B.** the level of output, but not in the level of prices.
- C.** the level of prices, but not in the level of output.
- D.** neither the level of output nor the level of prices.

ANSWER: A

31. Fiscal policy affects the economy

- A.** in both the short and long run.
- B.** only in the long run.
- C.** only in the short run.
- D.** in neither the short nor the long run.

ANSWER: A

32. The interest-rate effect

- A. is the most important reason, in the case of the United States, for the downward slope of the aggregate-demand curve.
- B. depends on the idea that increases in interest rates increase the quantity of money supplied.
- C. depends on the idea that increases in interest rates increase the quantity of money demanded.
- D. is the least important reason, in the case of the United States, for the downward slope of the aggregate-demand curve.

ANSWER: A

33. If the MPC = 0.6, then the government purchases multiplier is

- A. 2.5.
- B. 0.4.
- C. 10.
- D. 20.

ANSWER: A

34. In a certain economy, when income is \$100, consumer spending is \$60. The value of the multiplier for this economy is 4. It follows that, when income is \$101, consumer spending is

- A. \$60.75.
- B. \$60.25.
- C. \$61.33.
- D. \$64.00.

ANSWER: A

35. If businesses and consumers become pessimistic, the Federal Reserve can attempt to reduce the impact on the price level and real GDP by

- A. increasing the money supply, which lowers interest rates.
- B. increasing the money supply, which raises interest rates.
- C. decreasing the money supply, which raises interest rates.
- D. decreasing the money supply, which lowers interest rates.

ANSWER: A

36. If the Fed wanted to stabilize output, it could respond to a large increase in net exports by

- A. decreasing the money supply, which will increase interest rates.
- B. decreasing the money supply, which will reduce interest rates.
- C. increasing the money supply, which will increase interest rates.
- D. increasing the money supply, which will reduce interest rates.

ANSWER: A

37. The Phillips curve started as an observed ----- correlation between the inflation rate and the -----

- A. negative; unemployment rate
- B. positive; unemployment rate
- C. negative; nominal interest rate
- D. positive; nominal interest rate

ANSWER: A

38. According to the Phillips curve, policymakers would reduce inflation but raise unemployment if they

- A. decreased the money supply.
- B. increased government expenditures.

- C. decreased taxes.
D. increased the money supply.

ANSWER: A

39. If the Federal Reserve reduces the rate of money growth and maintains it at the new lower rate, eventually expected inflation will _____ and the short-run Phillips curve will shift _____.

- A. decrease; downward
B. decrease; upward
C. increase; downward
D. increase; upward

ANSWER: A

40. If the Federal Reserve increases the rate at which it increases the money supply, then unemployment is lower

- A. in the short run but not the long run.
B. in the long run but not the short run.
C. in the long run and the short run.
D. in neither the short run nor the long run.

ANSWER: A

PHẦN TỰ LUẬN (tổng số câu hỏi + thang điểm từng câu hỏi)

Câu hỏi 1: (1 điểm)

A country recently had GDP of \$1,500 billion. Its consumption expenditures were \$900 billion, its government spent \$300 billion, and it had a domestic investment of \$200 billion. What was the value of this country's net capital outflow? Show your work.

ANSWER:

We have, $Y = C + I + G + NX$

-> $NX = Y - (C + I + G) = 1500 - (900 + 300 + 200) = 100$

Therefore: $NCO = NX = 100$

Câu hỏi 2: (1 điểm)

The adult population in the town of Shelbyville is 150 thousand. If 100 thousand people are employed and 20 thousand are unemployed. Based on these numbers,

- a. What is the size of the labor force?
b. Find the unemployment rate in the town?

ANSWER:

a.

The labor force: $100 + 20 = 120$ thousand.

b.

U-rate = $20/120 * 100 = 16.67\%$

ĐÁP ÁN PHẦN TỰ LUẬN VÀ THANG ĐIỂM
