THANK YOU

Throughout more than four years of study and be trained under Van Lang University with love of job and devotion, devoted to the students of the lecturers in the Faculty of Engineering Thermal, helped students to accumulate a lot of specialized knowledge and skills needed in life.

My team would like to sincerely thank the Van Lang University, Department of training, Faculty Office and especially is Masters. Tue Nguyen Duy directly guided, helped the team during the graduate thesis with the subject “M&E System Design for Hera pharmaceutical factory”

Sincerely thank and expressing deepest gratitude to Dr. Tien Le Hung - Faculty of Engineering Thermal Dean, has been dedicated to helping students throughout the learning process at university. The teacher helped students accumulated a lot of knowledge in schools and life.

Sincerely thanks!
