Chapter 18

CONCLUSION AND RECOMMENDATIONS

Thesis is a scientific study of each student at the University, was conducted in the last phase of the course under the guidance of a teacher. Thesis consists of two main parts: part presentation and part drawings.

Under the guidance of master Vo Thien My, along with other teachers in the Faculty and classmates, the children were taken and completed the thesis of the group. The process of implementation of projects to help children know how to apply the knowledge learned during the learning period at the school on each particular sewn into the design of public buildings, such as the layout of air conditioning system, electric system, water supply and drainage system ... for specific works is the " NHI DONG 1 HOSPITAL " was built in the land with house number: 341, 10 Su Van Hanh Street, District 10, Ho Chi Minh City

18.1 RECOMMENDATIONS

Application of LEED in the design because of the mechanical and electrical works in the LEED standard has at least about 3 7 items (items 2, 3 and 5) is closely related to the mechanical and electrical engineers as well as it is is the development trend of the future around the world.
